

Cloud Computing

cloud computing is a range of services delivered over the internet, or “the cloud.” It means using remote servers to store and access data instead of relying on local hard drives and private data centres.

It has several steps & tools, as follow :-

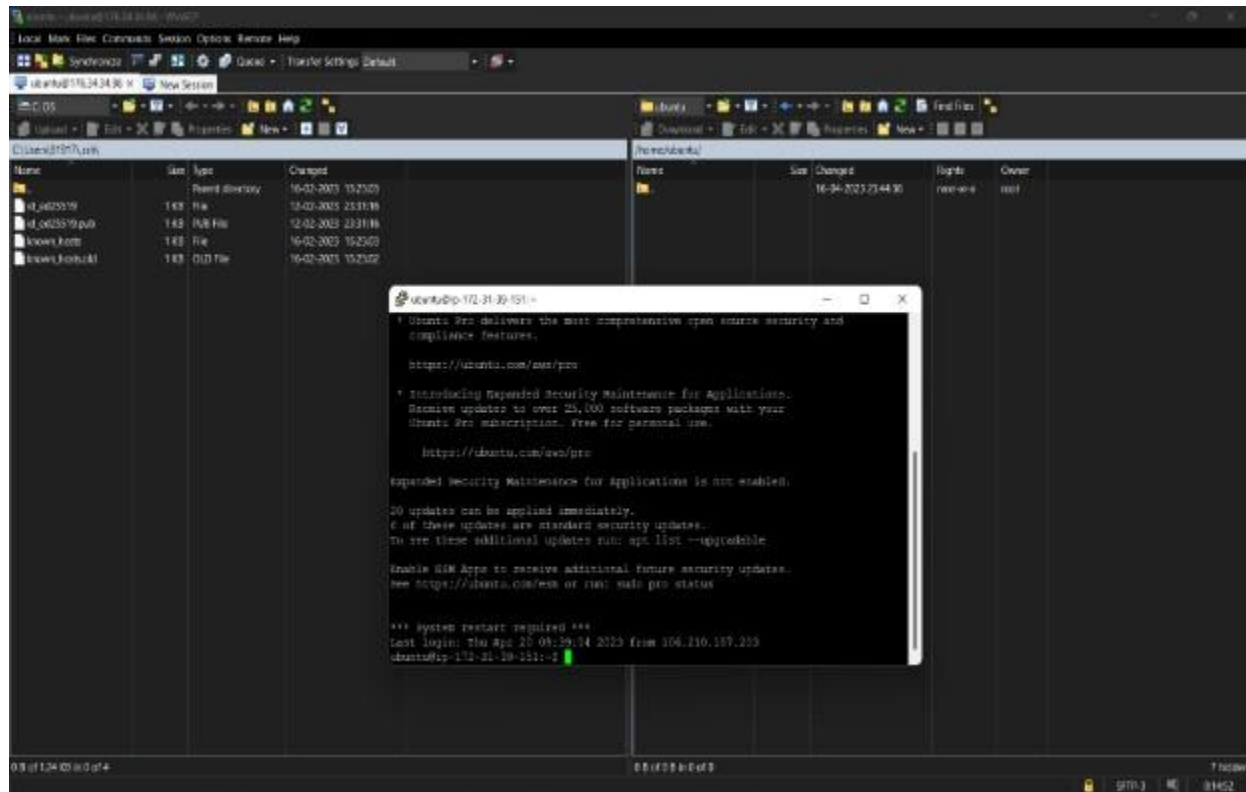

1. Git & Git hub
 2. AWS Server
 3. Winscp
 4. Chef
 5. Docker
 6. Jenkins
1. **Git hub Push** :- Take a project file with the version .open git bash in file directory then run command like –
- git init
 - git config user.name
 - git config user.email • git status
 - git add .
 - git commit -m "v1"
 - git log
- Open git hub repository
- Create repository back to git bash
- git add README.md
 - git branch -M master
 - git remote add origin <https://github.com/aherrushi027/intern-pro.git>
 - git push -u origin master
 - Git repository :- <https://github.com/Gauravk282/icinema>

2. AWS Server :- Create AWS accounts then create free tier EC 2 instance

3. Winscp :- Install Winscp, put AWS instance public Ip4 address & SSH authentication file.

4. Jenkins:- Build project ,connecting github repository to Jenkins by ssh key credentials.

14.04 - Installing Jenkins on...Jenkins 2.235.2: New Linux Repo...Internship Project #1 (Desktop)

localhost:8080/job/Internship%20Project/1/

Jenkins
